Hi Mark,

here is a quickly edited version. For the sake of expediency, may I suggest you tell AMEC that these changes aren't negotiable, unless the university is willing to completely scrap their schedule? I don't know why they felt compelled to embellish on the risk assessment conclusions and add a discussion of uncertainties that contain information that was in no way correct and belied a complete lack of understanding of risk assessment. Why do their engineers, geologists, and now attorneys have to constantly dabble in such stuff? Also, you'd think an attorney would understand that the definition of unrestricted exposure/unlimited reuse precludes the idea that the site would restricted to occupational exposure, but hey...

I also note that they changed the company name in to AMEC Environment and Infrastructure everywhere but in all the footers, where they left it as AMEC Geomatrix, Inc. I wish they'd spent their time focusing on things that apparently matter to them like that, rather than messing with the text.

Hope you have a good weekend!

Elizabeth

Mark; Attached are different forms of the final EECA. The first file shows your original edits and comments; the second shows our (including David's) revisions; and the last is a clean version for you with all edits accepted. We tried to merge the first two and it didn't work so thus the extra version. Anyway we will not do a final pdf until you have looked at this in case you have edits. If you need figures and tables, I can send those to you separately (in several emails). Kat is heading up the administrative process so please cc her on anything you want or changes you make. Thanks.

Gary,

Attached are the word files.

Let me know if you need anything additional.

Thanks,

Kat McPherson | Project Assistant
